## corten steel FORTÍS

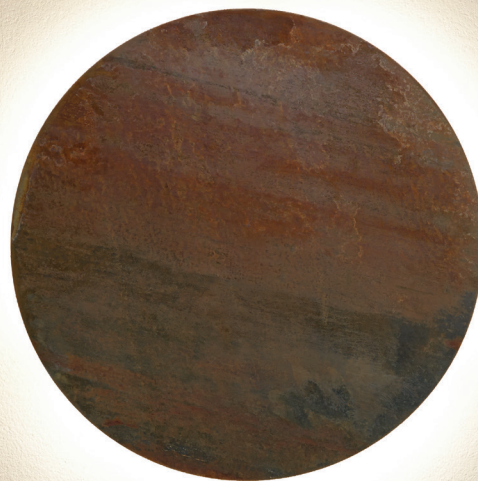

**Corten Steel (CS)** is a weathering steel that forms a stabilizing rust finish. This material is a corrosion resistant steel that develops an outer layer patina of rust when exposed to the environment. This process will begin here at Ultralights so that you will receive the fixture similar to its appearance in the product photography.

The actual pattern and coloration of our Corten Steel will vary from fixture to fixture. These variations are normal and part of the "natural" appearance that makes this finish and material desirable—no two pieces are exactly alike. This unique quality will intensify with age.

The material of application.  
The industry of strength.  
The versatility of time.
